DETAILED ACTION

The terminal disclaimer filed on 21 July 2008 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of Patent No. 6,743,826 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Remaining claims listed as withdrawn (52 and 53) have been rejoined with claims previously examined because they now encompass allowable species of the claimed genera.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph Coppola on July 31, 2008.

The application has been amended as follows:

- 1) In claims 47, 52 and 59, please change the word "amphotericin B" to "AMPHOTERICIN B®".
- 2) In claims 47, 52 and 59, please change the word "carbamazepin" to "CARBAMAZEPIN®".
- 3) In claims 47, 52, 53 and 59, please change the word "paclitaxel" to "PACLITAXEL®".
- 4) In claims 47, 52 and 59, please change the word "propofol" to "PROPOFOL®".

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The instant Invention is a composition of a water-insoluble pharmaceutical, such as Paclitaxel®, combined with plasma proteins, such as albumin. The composition is made by a unique process which results in unexpectedly high concentrations of drug in the mixture, stability under processing conditions including lyophilization and reconstitution, and a solution devoid of commonly-used biologically-incompatible solvents (see Inventor's publication: Paál, et al, 2001, Eur. J. Biochem, 268: 2197-2191, of record). The claims of the instant application are directed to compositions each comprising one of several anti-cancer agents, anxiolytics and antibiotics in a controlled aggregation state, combined with one or several human or animal plasma proteins. The claims are free of the prior art as the methods and compositions have not been utilized in the prior art at the solubility concentrations claimed. The specification provides experimental evidence of utility and enablement under 35 U.S.C. 112, first paragraph. The claims also meet 35 U.S.C. 112- second paragraph requirements because the claims point out and distinctly claim the invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 1646

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
